

Chaiknees - Documentation

Brief

Level Up Your Chinese & Shape Chaiknees! 🚀 Hi, I'm the developer of Chaiknees, a new app to learn Mandarin vocab smarter! HSK-aligned, personalized, spaced repetition & more. Try it out and tell me what you think! ✨ <https://www.chaiknees.com> #ChineseLearning #HSK #Vocabulary #DeveloperFeedback

Why Chaiknees?

Chaiknees is designed to be your effective and engaging companion on your Chinese language learning journey. Here's why Chaiknees stands out:

Learn according to official HSK standards: Whether you're preparing for HSK exams or building solid foundations in Mandarin Chinese, Chaiknees is based on official HSK vocabulary lists (both HSK 2.0 and the latest HSK 3.0 version). This ensures you're learning appropriate and recognized vocabulary.

Personalized learning experience: Chaiknees adapts to your individual needs. Create your own **User Dictionary** to learn words that are important to *you*. The app **tracks your "Difficult Words"** and learning progress, allowing you to focus on areas that need the most support. Personalized metrics on the **Dashboard** give you a clear overview of your learning habits and achievements.

Comprehensive and constantly evolving dictionary: Access to a rich dictionary with concise definitions for quick understanding and expanded definitions from CC-Cedict for deeper analysis. The Chaiknees dictionary is constantly refined, ensuring learning with clear and relevant word information, along with **popularity rankings** helping to prioritize common vocabulary.

Spaced repetition for long-term memory: Chaiknees uses a **Spaced Repetition System (SRS)**, a proven method for effective memorization. Words are repeated at increasing intervals, ensuring long-term retention.

Diverse and engaging question types: Learning isn't just about mechanical memorization. Chaiknees uses various question formats – **Audio, Translation, Hanzi, and Pinyin** – and response types such as **Multiple Choice and Writing**. This variety maintains engagement in learning and strengthens different aspects of word recognition and recall.

In-depth character analysis: Go beyond words and discover the fundamental elements of Chinese language through detailed **Character Cards**. Learn about radicals, stroke order (with Hanzi Writer for accuracy), and word construction to truly understand Chinese characters.

User-friendly interface: Chaiknees offers a clear and intuitive interface with **Light and Dark Mode** options. Easy navigation through clear header and footer, and helpful filters in Dictionary and Character Views, allowing you to find exactly what you need.

Continuous improvement: Chaiknees is committed to providing a smooth and efficient learning experience. You as the user can contribute to this app by sending feedback, we will love you to help us develop the best tools for learning!

Error handling and bug reporting, the app is constantly improved based on user experiences and feedback.

Glossary

HSK Dictionary - A vocabulary list based on the HSK (Hanyu Shuiping Kaoshi) standards. This dictionary is automatically generated from official word lists for each HSK level (e.g., HSK 1, HSK 2, etc.). It serves as a core vocabulary for learners studying for the HSK exams or aiming to build a foundational Chinese vocabulary.

User Dictionary - A personalized vocabulary list created by the user. This dictionary allows you to add words you encounter outside of the HSK curriculum, words you find particularly interesting, or words you want to focus on learning. It's your custom word collection within Chaiknees.

HSK Version - Chaiknees allows you to choose between two versions of the HSK vocabulary standards: HSK 2.0 and the newer HSK 3.0. HSK 3.0 is the most current standard, featuring a revised vocabulary and level structure. Selecting your HSK Version determines the vocabulary you will learn in the HSK Dictionary.

Difficult Definitions - Chaiknees allow you to use extended types of dictionaries - mix of CC-Cedict and other translations. Enabling difficult definitions will help you learn faster extended meanings of words and characters.

Difficult word - A word that the user has consistently struggled to learn or review correctly. Chaiknees automatically identifies difficult words based on your performance during learning and review sessions. These words are highlighted in the 'About You' section of your Dashboard to help you focus your study efforts.

Word level - Each word in Chaiknees progresses through four learning levels as you master it. These levels are associated with specific learning tasks designed to reinforce different aspects of word recognition and recall:

- **Level Audio:** Focuses on auditory recognition of the word's pronunciation.
- **Level Translation:** Tests your understanding of the word's meaning.
- **Level Hanzi:** Challenges you to recognize and recall the Chinese characters (Hanzi) for the word.
- **Level Pinyin:** Tests your knowledge of the word's Pinyin (romanization)."

After reaching Level 6 at all levels above a word, it will be called Review word.

Learning word - Words with all levels below 6. Words with all levels equal to 0 will trigger an app to show Word Card - New Word when in the Learning view.

Review word - Words with all levels above 6. When word reaches this level it will be using Spaced Repetition in intervals:

- 6: Next day
- 7: 3 days
- 8: 1 week (7 days)
- 9: 2 weeks (14 days)
- 10: 30 days (1 month)
- 11: 60 days (2 months)
- 12: 150 days (5 months)
- 13: 365 days (1 year)
- 14: 150 days (5 months)

Word card - A detailed view providing comprehensive information about a specific word. Word cards are used throughout Chaiknees, appearing in dictionary searches, learning sessions, and review feedback. They typically include elements like the Chinese characters, Pinyin, definitions, example sentences, audio pronunciation, and more.

Character card - Similar to a Word Card, but focused on individual Chinese characters (Hanzi). Character Cards provide details about a character's meaning, pronunciation, radical, stroke order, popularity, and example words that use this character. They are accessible from the Characters view and within Word Cards.

User character set - A collection of all the unique Chinese characters (Hanzi) you have encountered and learned through Chaiknees. As you learn new words, the constituent characters are added to your User Character Set. This set acts as a personal character library, and in some search functions, it can be used to filter results based on characters you already know.

CC-Cedict - An extensive, open-source Chinese-English dictionary providing detailed definitions and translations. Chaiknees utilizes CC-Cedict to offer rich dictionary information. Being a community-driven resource, while generally comprehensive and up-to-date, users should be aware that definitions may occasionally vary or contain errors. It's used in the 'Extended dictionary section' of Word Cards to provide in-depth information.

Popularity - Information about how popular current word or character is in Chinese language. Some words might have no known popularity.

Login/Register

To begin using Chaiknees, you need to create an account and log in.

Registration:

1. **First-time users** should click the "Register" button on the login page
 - a. or sign-up using Google or Github accounts. You will skip the rest of the process mentioned below.
2. You will be prompted to enter your **email address** and choose a **password**.
3. Passwords must be a minimum of **6 characters** long.
4. After submitting your registration details, Chaiknees will send a **verification email** to the email address you provided. This email is sent via Firebase authentication services.
5. You need to **verify your account** by clicking the link in the verification email. This step is essential to activate your Chaiknees account.
6. Once your account is verified, you can proceed to log in.

Login:

1. **Returning users** can log in by entering their registered **email address** and **password** in the designated fields on the login page.
 - a. or sign-in using Google or Github accounts. You will skip the rest of the process mentioned below.
2. Click the "Login" button to access your Chaiknees account.
3. **Password Management:** Chaiknees allows you to change your password after logging in through the profile settings (described in the Profile View section).
4. **Security:** For security reasons, login and registration attempts will fail temporarily if there are more than 5 unsuccessful attempts. This is a security measure to protect user accounts.
5. **Firebase Authentication:** Chaiknees utilizes Firebase for all authentication processes. This means that user passwords are not stored in the Chaiknees database or logs, ensuring a secure authentication system.

Navigation

The header provides quick access to the main sections of Chaiknees.

- **Home:** Returns you to the Dashboard view.
- **Learn:** Takes you to the Learn view where you can start learning new words.
- **Dictionary:** Opens the Dictionary view to browse and search words.
- **Characters:** Navigates to the Characters view to explore Chinese characters.
- **Profile:** Access your user settings and profile information.

The footer offers secondary actions and information.

- **Start:** Opens a landing page of Chaiknees (www.chaiknees.com)
- **Terms of Use:** Links to the legal terms and conditions of using Chaiknees.
- **Dashboard:** Quickly returns you to the Dashboard view
- **Logout:** Logs you out of your Chaiknees account.

Views

Setup view

The Setup View is the first screen new users encounter after installing or launching Chaiknees for the first time. It allows users to configure essential settings related to display preferences, dictionary definitions, and HSK version *before* they begin their Chinese learning journey. This view ensures a personalized initial experience.

Setting Configuration Boxes (Three Columns): The view is structured into three distinct boxes, each dedicated to a specific initial setting.

- *Dark mode* - Changes Dark/Light mode in the app
- *Difficult Definitions* - If you enable this option, you will see the definition of the word from the CEDICT dictionary. Allows you to learn more meanings of the word at the same time.
- *HSK version* - This cannot be changed! (We highly recommend HSK2.0!) HSK2.0 is the old version of the HSK test. HSK3.0 is the new version of the HSK test.

Dashboard view

The Dashboard is your central hub in Chaiknees, providing a snapshot of your learning progress and quick access to key learning activities. It is the first screen you see after setting up your account.

All words to learn - This section summarizes your upcoming learning and review tasks.

- **Learn:** Shows the number of new words ready to be learned. Click to start a 'Learn' session.
- **Review:** Shows the number of words due for review. Click to start a 'Review' session.
- **Difficult:** Shows the number of words identified as 'Difficult'. Click to focus on learning these words.

Calendar: Visually displays your scheduled review tasks across the week, helping you plan your study time.

About you: Provides personalized learning metrics and quick links.

- **Review time:** Estimates the total time needed for today's reviews.
- **HSK Version:** Displays the HSK version you are currently studying.
- **Difficult word:** Shows the most recent 'Difficult word' you encountered. Click to view its Word Card and review it.

Learn view

The Learn View is your starting point for learning new Chinese vocabulary. Here, you can select the dictionaries or HSK levels you wish to study and initiate focused learning sessions.

Dictionary Selection: Shows all available dictionaries and HSK levels the user is currently set to learn from. These are:

- "Learn HSK X - Version Y"
- "Learn from your dictionary"
- "All words to learn" (Aggregation of the above)

Learning Session Launch Buttons: For each dictionary/level, there are "Difficult," "Review," and "Learn" buttons with associated word counts.

- **Learn:** Shows the number of new words ready to be learned. Click to start a 'Learn' session.
- **Review:** Shows the number of words due for review. Click to start a 'Review' session.
- **Difficult:** Shows the number of words identified as 'Difficult'. Click to focus on learning these words.

Note: This section provides a consolidated learning option. You can choose to use this for a mixed learning session, or focus on specific dictionaries/levels using the sections above.

Learning view

The Learning View is the central part of Chaiknees where you actively learn new Chinese words. It guides you through a structured learning flow designed to help you memorize vocabulary effectively.

1. **Core Learning Flow:** The learning process in this view follows a cyclical pattern:
 - New Word Presentation (Word Card - New Word):
 - A "Word Card - New Word" is displayed, introducing you to a new vocabulary item.
 - Word Card - New Word content:
 - Basic information about currently learning word
 - *List of Example Sentences:* Provides contextual examples of the word in use.
 - *Hanzi strokes:* When expanded, this section shows the animated stroke order for writing the Chinese character, and information about the character's radical.

- *Other dictionaries*: When expanded, this section reveals if the word is included in other dictionaries within Chaiknees, such as different HSK levels or versions.
- *Word Management & Action Buttons*
 - *"Ignore" Button*: Allows you to mark the word as ignored, likely removing it from your immediate learning queue.
 - *"Favorite" Button (Heart Icon)*: Allows you to add the word to your favorites list for later review.
 - *"Audio" Button*: Plays the pronunciation of the word itself (distinct from sentence audio).
- **Interaction**: After reviewing the "Word Card - New Word," you proceed to the next step, typically by clicking a "Learn next one" button.

2. Question & Answer:

- You are presented with a question related to the new word you just saw.
- Question Types:
 - **Audio**: Listening to the word's pronunciation and identifying it.
 - **Translation**: Providing the English translation of the Chinese word.
 - **Hanzi**: Recognizing or writing the Chinese characters (Hanzi).
 - **Pinyin**: Recalling or typing the Pinyin romanization.
- **Interaction**: You interact with the question by:
 - **Picking an answer**
 - **Typing an answer**

3. Feedback & Word Card Pop-up (Word Card - Pop-up):

- After submitting your answer, you receive immediate feedback on your performance (success or failure). Sound will also play.
- A "Word Card - Pop-up" appears, providing a simplified summary of the word.
- Word Card - Pop-up content:
 - Basic information about currently learning word
 - *List of Example Sentences*: Provides contextual examples of the word in use.
 - *Sentence Management Buttons*, these buttons allow you to manage example sentence:
 - *"Feedback" Button (Flag Icon)*: Send feedback about current sentence. You will be shown a popup. You can select the issue and send it to our developer team.
 - *"Audio" Button*: Plays the audio pronunciation of the word.
 - *Word Management & Action Buttons*
 - *"Ignore" Button*: Allows you to mark the word as ignored, likely removing it from your immediate learning queue.
 - *"Favorite" Button (Heart Icon)*: Allows you to add the word to your favorites list for later review.
 - *"Audio" Button*: Plays the pronunciation of the word itself (distinct from sentence audio).

- **Action:** After reviewing the feedback in the "Word Card - Pop-up," you proceed to the next word in your learning session, by clicking a "Learn next one" button.

4. Repetition and Mastery:

- Chaiknees uses a spaced repetition system. You may encounter the same new word multiple times within a learning session, and in future review sessions.

The header provides quick access to the main dashboard of Chaiknees. Navigation bar also presents all word levels and the amount of tasks needed to finish all the learning tasks.

To enhance your learning speed and efficiency, Chaiknees supports keyboard shortcuts during question and answer sessions:

- **Enter key:** Press the **Enter** key to submit your answer and proceed to the next question after making a selection or typing your response.
- **1 to 6 keys:** In multiple-choice questions (ABCD format), use the number keys **1**, **2**, **3**, **4**, **5**, and **6** to directly select the corresponding answer choice. Typically, choices will be mapped to numbers 1-4, but the app supports up to 6 choices if needed in certain question types in the future.

Word card

The Word Card provides a comprehensive view of a Chinese word, offering detailed information for study and word management. It is designed to be a central resource for understanding and interacting with individual vocabulary items within Chaiknees. Word Cards appear in various contexts, such as dictionary searches, learning sessions, and when reviewing difficult words.

Header: Located at the very top of the Word Card, it provides essential word identification and quick actions.

- **Color border** - indicates current status of a word
 - Brown - Learning word
 - Green - Reviewing word
 - Purple - Difficult word
 - Red - Ignored word
- **Chinese Character:** The simplified Chinese character (Hanzi) for the word.
- **Pinyin:** The Pinyin romanization of the word is shown below the character

- *Basic Definition/Translation*: A concise English translation of the word's primary meaning is presented
- *Word Management Buttons*: Located to the right of the basic word information, these buttons allow you to manage the word:
 - *"Ignore" Button*: Allows you to mark the word as ignored, excluding it from learning sessions and review queues.
 - *"Favorite" Button (Heart Icon)*: Adds the word to your "Favorites" list for easy access and focused review.
 - *"Audio" Button*: Plays the audio pronunciation of the word.

Statistics Section (Learning Level Indicators): Positioned below the header, this section visually represents your learning progress for the current word across different "Word Levels."

- *Level Indicators*: Four horizontal bars with icons and numerical counters visually represent the four "Word Levels" (Audio, Translation, Hanzi, Pinyin).
- *Style of indicators will change with each level*.

Extended Dictionary Section: Provides in-depth dictionary information, drawing from the CC-Cedict open-source dictionary.

- *Detailed Definition*: A more comprehensive English definition of the word, including nuances and multiple meanings.
- *Popularity*: Indicates the word's popularity rank in the Chinese language.
- *Part of Speech/Category*: Provides additional grammatical or categorical information about the word.

Collapsible Sections (Expandable for Details): The following sections are presented as collapsible panels, allowing users to focus on specific details when needed and avoid information overload.

- *Example sentences* - When expanded, this section displays example sentences using the current word in context.
 - *Sentence Management Buttons*, these buttons allow you to manage example sentence:
 - *"Feedback" Button (Flag Icon)*: Send feedback about current sentence. You will be shown a popup. You can select the issue and send it to our developer team.
 - *"Audio" Button*: Plays the audio pronunciation of the word.
- *Hanzi strokes*: When expanded, this section shows the animated stroke order for writing the Chinese character, and information about the character's radical.
- *Other dictionaries*: When expanded, this section reveals if the word is included in other dictionaries within Chaiknees, such as different HSK levels or versions.
- *Advanced settings*: When expanded, this section provides advanced word management options
 - *Set to Review Level (Level 6)*: Allows you to manually set the word to "Review" mode, placing it into a reviewing words list.
 - *Set to Learn Level (Level 0)*: Allows you to reset the word to "Learn" mode (Level 0), restarting the learning process for this word.

- *Remove word from your dictionary:* (Only for User Dictionary words) - Deletes the word from your custom User Dictionary.
- *Send word feedback* - send feedback about word to Chaiknees developer, you will be prompted with an input field.

Close Button: Located at the bottom right "[x]", this button closes the Word Card, returning you to the previous view (e.g., Dictionary view, Learning view).

- **(Click outside to close):** Clicking outside the Word Card area also closes it, providing an alternative dismissal method.

Accessing Word Cards: Word Cards can be accessed from:

- *Dictionary View:* Clicking on a word in the word list opens its Word Card.
- *Learning View:* "Word Card - New Word" introduces new words, and "Word Card - Pop-up" provides feedback after questions.
- *Dashboard View:* Clicking on a "Difficult word" in the "About you" section opens its Word Card.

Dictionary view

The Dictionary View allows you to browse, search, filter, and manage the vocabulary available in Chaiknees. It provides access to both the HSK dictionaries and your personal User Dictionary, enabling you to explore words, review their details, and add new words to your learning.

"Filter words" Section: Allows you to filter the displayed word list based on word status.

- *"ignored":* Filters to show only words you have marked as "ignored."
- *"favourite":* Filters to show only words you have added to your "favorites."
- *"difficult":* Filters to show only words identified as "difficult" for you.
- *"reviewing":* Filters to show only words currently in your "reviewing" queue.
- *"learning":* Filters to show only words currently in "learning" mode.

Functionality: Clicking on a filter button toggles that filter on or off, dynamically updating the word list below. You can apply multiple filters simultaneously (e.g., "difficult" and "reviewing").

Dictionary Lists Section: Organizes vocabulary into expandable lists based on dictionary source.

- **"HSK 1 - Version 3.0" List (Example):** Represents an HSK level dictionary.
- **"Your dictionary" List:** Represents your personal User Dictionary.
- **"Add new words":** Located below the dictionary lists.

- *Function:* Clicking this button expands the "Add new words" section (described below) to allow you to search for and add new words to your User Dictionary.
- *"Character-Based Search" Button:*
 - *Function:* Initiates a search for words only using characters that are already in your "User character set." If you type "all," it will find all possible combinations of characters from your set that are valid words in the dictionary.
- "Search" Button:
 - *Function:* Initiates a broad search across the *entire* Chaiknees dictionary for words matching the simplified Chinese characters entered in the input field.
- Search for definition "Search" Button - A separate input field for searching by English definition.
 - *Function:* Initiates a search for words whose English definitions match the text entered in the "Search for definition" input field.

Word List Display (After Expanding a Dictionary List or Performing a Search): Presents a list of words matching the selected dictionary or search criteria.

Column Headers: Clearly labels each column of information:

- *"Popularity":* Displays the popularity rank of the word
- *"Simplified":* Shows the simplified Chinese characters of the word
- *"Pinyin":* Displays the Pinyin romanization of the word
- *"Translations":* Shows the English translation/definition of the word
- *"Card" Button:* Located in the last column for each word.
 - *Function:* Clicking this button opens the "Word card" for the corresponding word, allowing you to view detailed information and manage the word.
 - *Context:* After performing a search using "Character-Based Search" or "Search for definition," the "Card" button in the word list is replaced with an "Add word" button.
 - *Function:* Clicking "Add word to button" adds the corresponding word to your "User Dictionary."

Characters view

The Characters View displays your personal "User character set" - a collection of all the unique Chinese characters (Hanzi) you have learned in Chaiknees. This view allows you to browse your character collection, search for specific characters, and access detailed information about each character through Character Cards. It visually represents your progress in building character recognition skills.

Character Search Section: Provides a search function to find specific characters within the dictionary.

- **"Search for character" Input Field:** A text input field where you can type in a Chinese character (Hanzi) to search for.
- **"Search" Button:** Initiates the character search.
 - **Function:** When you enter a character and click "Search," Chaiknees will search the dictionary for that character and, if found, open the "Character card" for the searched character.

Character Lists Section: Organizes characters into expandable lists, grouped by learning level or dictionary source.

- **Character Grid within Lists** - When a list is expanded, it displays a grid of character "boxes" or buttons. Each box contains a single Chinese character (Hanzi) from that HSK level.
 - **Function:** Clicking on a character box opens the "Character card" for that specific character, allowing you to view detailed information.

Character card

The Character Card provides a comprehensive information panel for individual Chinese characters (Hanzi). It offers details about a character's meaning, pronunciation, linguistic properties, usage in words, and stroke order. Character Cards are accessible from the Characters View and from within Word Cards. They serve as a dedicated resource for in-depth character study.

Header: Located at the top of the Character Card, it presents core character information.

- **Chinese Character:** The simplified Chinese character (Hanzi) is displayed prominently and large at the top
- **"Popularity":** Indicates the character's popularity rank in the Chinese language.
- **"Radical":** Displays the character's radical, which is a key component for character classification and dictionary lookup.
- **"Strokes":** Indicates the total number of strokes required to write the character.

Collapsible Sections (Word Formation & Stroke Order): The following sections are presented as collapsible panels, allowing users to explore different aspects of character usage and formation in a structured way.

- **"Hanzi strokes" Section:** When expanded, this section likely displays an animated stroke order diagram for writing the character, visually demonstrating the correct stroke sequence.
- **"Head words (User characters)"** - When expanded, this section shows a list of "head words" (words where the current character appears at the beginning) that can be formed using the current character *and* characters that are already in the user's "User character set."
- **"Tail words (User characters)"** - When expanded, this section shows a list of "tail words" (words where the current character appears at the end) that can be formed using the current character *and* characters from the user's "User character set."

- *Middle words (User characters)* - When expanded, this section shows a list of "middle words" (words where the current character appears in the middle) that can be formed using the current character *and* characters from the user's "User character set."
- *All head words (Dictionary Wide)* - When expanded, this section shows a list of "head words" that can be formed using the current character, drawing from the *entire* Chaiknees dictionary (not limited to the user's character set).
- *All tail words (Dictionary Wide)* - When expanded, this section shows a list of "tail words" that can be formed using the current character, using the *entire* dictionary.
- *All middle words (Dictionary Wide)* - When expanded, this section shows a list of "middle words" that can be formed using the current character, using the *entire* dictionary.

Close Button: Located at the bottom right "[x]", this button closes the Character Card, returning you to the previous view (e.g., Characters view, Word Card).

- **(Click outside to close):** Clicking outside the Character Card area also closes it.

Accessing Character Cards: Character Cards can be accessed from:

- *Characters View:* Clicking on a character box in the character lists opens its Character Card.
- *Search:* Searching for a character in the Characters View search bar and clicking "Search" opens the Character Card for the searched character (if found)

Profile view

The Profile View allows you to manage your basic Chaiknees user settings and account preferences. It provides controls for customizing your learning experience and managing your account.

"HSK Settings" Button - The "HSK Settings" section allows you to customize your HSK learning experience and track your progress across different levels. Access this section by clicking the **HSK Settings** button. Please note that actions within this section may be irreversible, so proceed with caution.

Purpose: This section enables you to manage your HSK dictionaries and learning statistics. It is designed to give you the flexibility to focus on specific HSK levels, allowing you to start learning at a level that suits your current proficiency.

Dictionary Lists

- **Level Organization:** HSK levels are presented in expandable lists for easy navigation.

Statistics

This section provides an overview of your progress within the selected HSK level:

- *Status*: Indicates the current learning status of the level (e.g., Learning, Mastered).
- *Words in level*: Total number of words included in the selected HSK level.
- *New characters in level*: Number of unique characters introduced in this specific HSK level. Note that this count excludes characters already learned in previous HSK levels.
- *Known characters from level*: Number of characters from this HSK level that you have already learned and added to your character set.
- *Words left to learn*: Number of words in this level that are currently in the "learning" phase.
- *Words to review now*: Number of words from this level that are due for review.
- *Words not seen*: Number of words in this level that you have not encountered yet.
- *Words ignored*: Number of words from this level that you have chosen to ignore.

Actions

This section provides actions to manage characters and words within the selected HSK level.

Characters Actions

- *Remove all characters from your set*: Removes all characters unique to the selected HSK level from your personal character set.
- *Add all characters to your set*: Adds all characters unique to the selected HSK level to your personal character set.

Words Level Actions

- *Reset all words to Learn Level (Level 0)*: Resets all words in the current HSK level back to "Learn Level 0." You will need to relearn these words from the beginning.
- *Set all words to Review Level (Level 6)*: Sets all words in the current HSK level to "Review Level 6." You will need to review these words again.
- *Set all words to Master Level (Level 14)*: Sets all words in the current HSK level to "Master Level 14." If words are not yet learned, you will need to review them first before they reach Master Level and are removed from your review queue.

HSK Level Actions

- *Add new HSK level*: Adds the selected HSK level to your active learning levels, making its words available for learning.
- *Disable HSK level*: Disables the selected HSK level, hiding all its words from your learning sessions. You will not see words from this level while it is disabled.

- *Enable HSK level:* Enables a previously disabled HSK level, making its words visible and available for learning again.
- *Remove HSK level:* Removes the selected HSK level from your learning levels. Words from this level will be added back to your general dictionary, and your learning progress for these words will be preserved.

Confirmation: After clicking any action button in the "HSK Settings" section, a confirmation pop-up will appear to ensure you intended to perform the selected action.

"Difficult definitions" Toggle/Switch: Allows you to choose the dictionary source for word definitions throughout the app.

"Dark mode" Toggle/Switch: Allows you to switch the app's visual theme between light and dark mode

"Logout" Button: Allows you to securely log out of your Chaiknees account.

FAQ

I didn't receive a verification email?

Make sure you use the proper email and register again. If nothing changes write us an email contact@chaiknees.com

Is it possible to change the password?

Yes, you need to fail logging in once and you will be prompted with password change

Can I delete my account?

Yes, write us an email contact@chaiknees.com

Can I change my HSK Version from 3.0 to 2.0?

Manually, not yet. But we can help you, write us an email contact@chaiknees.com

Can I skip HSK Level?

No, you need to finish first level before you can proceed.
